T 377  
\* NOTICE \*

Having the largest and most complete stock of Mathematical, Engineering and Surveying Instruments in the United States, we are enabled to furnish all goods mentioned herein, of the best quality, and at the lowest prices.

In ordering from this Catalogue it is only necessary to mention this edition and to give the number of the Instrument or article desired.

The prices mentioned will be strictly adhered to, except when large quantities are ordered.

## TERMS CASH.

The safest and best method of remitting money, is by a Bank Draft or Post Office Money Order, made payable to my order. Money Orders can now be obtained for a small sum at most all Post Offices in the United States. When neither of these can be procured, United States, or National Bank Notes, or Postage Stamps, may be remitted by Registered Letter, or sent by express.

When no satisfactory Baltimore, Philadelphia or New York references is given by the party ordering the goods, the money must accompany the order, or if preferred, the goods will be sent by Express, C. O. D. (collect on delivery), *provided the order is accompanied with a remittance of Five Dollars*, and when the order comes from West of the Mississippi, the order must be accompanied by a remittance of Ten Dollars. The object of this is to insure the goods being taken, as we have frequently sent goods by Express which have not been taken out of the office, and have had to pay freight and charges both ways.

The charge for collecting and returning the money will be added to the bill.

*Articles of glass can only be sent by mail at full letter rates, namely, four cents per ounce.* Merchandise, not glass, can be sent unsealed, at one cent per ounce.

Goods ordered to be sent by mail must be prepaid, and the return postage included in the remittance.

All goods sold by us, are warranted in perfect order, but we assume no responsibility for breakage or other damage, after a package leaves our store.

Packing boxes will be charged at cost, and all goods will be packed with the utmost care.

# Blue Print Paper

—: FOR :—

## COPYING TRACINGS.

---

This Blue Process, now extensively used in the Drawing-Rooms of our most prominent Railroads, in Engineers' and Architects' Offices, saves not only much labor and expense, but a great deal of weariness to the junior draftsman, to whose lot it usually falls to make copies or tracings of drawings. The manipulations required are of the simplest possible kind, and are entirely within the skill and comprehension of any office-boy who can be trusted to copy a letter in an ordinary press. These particulars are as follows:

1. Provide a flat board as large as the tracing which is to be copied, or better, a photographic frame specially made for the purpose.
2. Lay on this board two or three thicknesses of common blanket, or its equivalent, to give a slightly yielding backing for the paper.
3. Lay on the blanket the prepared paper with the sensitive side uppermost.
4. Lay on this paper the tracing, smoothing it out as perfectly as possible, so as to insure a perfect contact with the paper.
5. Lay on the tracing a plate of clear glass, which should be heavy enough to press the tracing close down upon the paper. Ordinary plate glass of  $\frac{3}{4}$  inch thickness is quite sufficient.
6. Expose the whole to a clear sunlight, by pushing it out on a shelf from an ordinary window, or in any other convenient way. IN BRIGHT SUNLIGHT LIKE MIDSUMMER, ONLY FOUR MINUTES REQUIRED. A GREAT DEAL DEPENDS UPON THE SUN'S BRIGHTNESS AND HEAT. Frequently when complaints are made about prepared paper, OFTEN IT IS NOT THE FAULT OF THE PAPER, BUT NOT EXPOSED LONG ENOUGH to develop it. Experience will teach you a great deal more than I can. If a clear skylight only can be had, the exposure must be continued for thirty to forty-five minutes, and under a cloudy sky, sixty to ninety minutes may be needed.
7. Remove the prepared paper and drench it freely for ten minutes or longer, in clear water, and hang it up by one corner to dry.

The paper should be stored in a dry place, and be entirely shielded from the sunlight before being used.

The paper is of a full yellow or bronze color. After the exposure to the light the surface becomes a darker bronze or yellowish gray, and the lines of the tracing appear as still darker on the surface. Upon washing the paper, the characteristic blue tints appear with the lines of the tracings in vivid contrast.

Such copies can be taken from tracings only, either made on tracing-paper or cloth. A very deep black India Ink should be used, as the distinctness of the copies depends thereon.

# Printing Frames.

Print Frames made of hard wood. finely finished, with Glass and Cushions complete :

Polished Plate Glass.	Double Thick Glass.	Frames Only.

Having ample room in my new store, No. 3 North Charles street, to store and display a complete stock of Mathematical Goods, and having made large additions in that department, I would respectfully call your attention to my stock of Drawing, Mounted, Tracing and Detail Papers, also Tracing Cloths and Mathematical Instruments of all descriptions. I am also now prepared to receive orders for Sensitized Blue Print Paper in sheets of any size, or continuous rolls of 10 yards each, at the following low prices :

Prepared in sheets	Size 16x21	20x33	24x40	27x40	31x53
Per Quire	\$1 50	\$2 50	\$2 75	\$3 00	\$5 00
Prepared in Rolls of 10 yards—Width	27 ins.	30 ins.	36 ins.	42 ins.	
Per Roll, - - -	\$2 15	\$2 30	\$2 75	\$3 60	

Full Rolls and Quires subject to discount of 15 per cent.

This paper is prepared by our new process, and the advantage to the customer can easily be appreciated when they know the paper has just been sensitized and will copy sharp and clear. All paper prepared immediately on receipt of order and forwarded same day.

For those who do their own sensitizing I have on hand a LARGE STOCK OF UNPREPARED BLUE PRINT PAPER of my own importation in widths of 27 inches, 30 inches, 36 inches, 42 and 54 inches, also all other papers now in use on the market, and would be pleased to furnish prices and discounts. Should you need Mathematical Instruments, Drawing or Tracing Papers, or Cloths, write for our 200 page Illustrated Catalogue, and you will find our prices are the lowest and discounts the best. My goods are the best manufactured and imported.

Architects, Engineers, &c., in any part of the country, who have no facilities for making "Blue Prints," can send us their tracings, stating number of copies required, from which we will produce the desired prints and promptly return same to sender. Prices will be sent on application.

# J. KERN'S

## Swiss Drawing Instruments.

These instruments are celebrated for being more perfectly made than those of any other manufacturer. They are unexcelled for their uniform finish and quality of workmanship, being made of the best steel and German silver.

## DIRECTIONS FOR USING AMSLER'S POLAR PLANIMETER.

By means of AMSLER'S POLAR PLANIMETER, a person entirely ignorant of geometry may ascertain the area of any planimetric figure, no matter how irregular its outlines may be, more correctly, and in much shorter time, than the most experienced mathematician could calculate it.

The management of the instrument can be easily learned in half an hour, and in size it is no larger than a two-feet folding rule.

The Planimeter indicates square feet, or square inches, and acres for surveying.

**DIRECTIONS.**—Preparatory to the use of the instrument, ascertain its state. The index roller D must play easily, without coming in contact with the nonius (or vernier). The screw centres, on which its axis revolves, must be adjusted so as to allow perfect freedom of rotation; the same is to be observed for the centre pin C.

The needle point E ought to project but very little from its socket. Great care must be taken not to bend any part of the instrument.

To ascertain the area of a figure in square inches, slide the square rod A into the tube H, so that the line marked 10 sq. in. (10 square inches) stands fair with the beveled part of the tube J. Then set the instrument on the paper, so that the index roller D, the tracing point F, and the needle point E, rest on the paper; press the latter point a little on the paper—not enough to pierce it through. This point is to remain stationery during the whole operation. Set the tracing point F on any point P of the outline, and mark that point, and read off the state of the counting wheel G, and the index roller D. Suppose the counting wheel indicates 3 (as in cut), the index roller 905 (90 degrees to be read on the index roller, and  $\frac{5}{10}$  on the nonius), so that the O of the nonius stands on  $90\frac{5}{100}$  of the circumference of the index roller. Write down the number just read off thus, 3,905.

Now follow, with the tracing point F, the outline of the figure, or part of the figure to be measured, with great exactness, in the same direction as the hands of a watch would move, until you arrive at the starting point.

Straight lines may be followed along a rule; then read off again the state of the indicators. Suppose you find now 5,763, *i. e.* the counting wheel indicating 5, and the index roller and nonius  $76\frac{3}{10}$  degrees. From these two readings, the area found is to be obtained, and here two points are to be considered.

**A.** If the needle point E is outside of the figure just traced round, the first number (3,905) is to be deducted from the second number (5,763).

5,763

3,905 and the remainder (1,858) is to

be multiplied by ten, equal 18.58;

1,858

which is the area desired.

**B.** If the needle point E is inside of the outlines of the figure, add to the number last read off (5,763) the number marked on the side of the square rod next to where 10 sq. in. is marked on the upper side.

In this case, it is 20,240, the last number

5,763 read off

20,240

26,003

Deduct from this

3,905

amount the number first read off,

22,098 Multiply this remainder by

ten, equal 220,98, and this is the amount of square inches, or area of the measured figure.

It is of no consequence whether the roller moves inside or outside of the cut-lines of the figure, provided it moves on a smooth surface even with the figure.

To obtain the area in square feet, slide the square rod into the tube up to the line marked 0,1 sq. ft. or 0,05 sq. ft. In this case the difference between the first and second readings of the indicators is to be multiplied by 0,1 or 0,05. If the difference, for instance, is 4,653, the rod being up to the line marked 0,1 sq. ft., then is  $4,653 \times 0,1 = 0,4653$  equal to the area in decimal fractions of a square foot.

If the needle point is within the outlines of the figures as described in B, proceed the same way as at B, but multiply by 0,1 or 0,05.

If the figure to be measured is at a reduced scale, the result has to be multiplied by the square of the proportion of the reduction. If the proportion of the figure to the full size is as 1 : 10, the result is to be multiplied by  $10^2 = 100$ —for instance : the result of the first example is 1,858, which multiplied by 100 ( $1,858 \times 100$ ) = 1858 sq. inches, would be amount of the area.

If the amount of acres is to be ascertained, the proportion of the reduction being 1 : 1000, slide the square rod up to the line marked 2 ac. 1 : 1000, or 1 ac., and operate as indicated above : the result is to be multiplied by 1 or 2, instead of 10 or 5. If the rod is set up to the line marked 1 ac., no multiplication is necessary.

Should the plan of the piece of land be drawn on a smaller scale than  $\frac{1}{1000}$ —for example,  $\frac{1}{5000}$ th—then multiply the result with the square of the proportion of the reduction to the scale of  $\frac{1}{1000}$ . Thus, for the scale of  $\frac{1}{5000}$ th, the result would have to be multiplied by  $5 \times 5 = 25$  ( $\frac{1}{5000}$ ths being to  $\frac{1}{1000}$ th as 5 : 1). If the scale is  $\frac{1}{5000}$ th, multiply the result by  $\frac{1}{2}^2 = \frac{1}{4}$ , that is to say, divide the result by 4.

*Remark.*—If, on reading off the horizontal or counting wheel, G, the indicator points near the middle line between two figures, say between 3 or 4, then see how the index roller stands to the nonius. If the 0 on the nonius is on the lower side of the 0 of the roller, therefore near 100, then read 3 ; but if the 0 on the nonius is on the upper side, therefore near 0 on the roller, then read 4 for unity.

If the horizontal wheel turns on its axis during the tracing operation, so that it goes beyond 0 (in fact 10), and even marks several revolutions, and then stops at any number—for instance, 7—you read 17 or 27, &c., adding as many times ten as the wheel has made full revolutions.

It is easy to notice the number of revolutions. If the wheel G marks six, and the roller D is, for instance, on 0 degrees  $\frac{1}{10}$  degrees, or on 4 degrees  $\frac{1}{10}$  degrees, then the reading is of course 6,007, or 6,047. The number read off the nonius always taking the third place after the units.

The cut shows the actual size of the instrument.

Price in Box . . . . . \$30 00

Draftsmen, engineers, surveyors, ship builders, architects, machinists, will please devote a few moments only to the examination of this instrument, and they will at once be convinced of its great importance and value.

3353. Flat Boxwood Scale, 24 inches long, divided  $\frac{3}{8}$ ,  $\frac{3}{4}$ ,  $1\frac{1}{2}$  and 3 inches to the foot . . . . . each \$3 00
3354. Beveled Boxwood Scale, 12 inches long, divided  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{1}{2}$  and 1 inch to the foot; reverse side  $\frac{3}{8}$ ,  $\frac{3}{4}$ ,  $1\frac{1}{2}$  and 3 inches to the foot " 1 50
3355. Triangular Boxwood Scale, 6 inches long, divided 10, 20, 30, 40, 50 and 60 parts to the inch . . . . . " 1 50

## 3356.

3356. Triangular Boxwood Scale, 12 inches long, divided 10, 20, 30, 40, 50 and 60 parts to the inch . . . . . each \$2 00
3357. Triangular Boxwood Scale, 12 inches long, divided 20, 30, 40, 50, 60 and 80 parts to the inch . . . . . " 2 00
3358. Triangular Boxwood Scale, 24 inches long, divided 10 to 60 or 20 to 80 parts to the inch . . . . . " 5 00
3359. Triangular Boxwood Scale, 6 inches long, divided  $\frac{3}{8}$ ,  $\frac{3}{4}$ ,  $1\frac{1}{2}$ ,  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ , 1,  $1\frac{1}{2}$  and 3 inches to the foot, and one edge  $\frac{1}{8}$  of an inch . . . . . " 1 50

## 3360.

3360. Triangular Boxwood Scale, 12 inches long, divided  $\frac{3}{8}$ ,  $\frac{3}{4}$ ,  $1\frac{1}{2}$ ,  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ , 1,  $1\frac{1}{2}$  and 3 inches to the foot, and one edge  $\frac{1}{8}$  of an inch . . . . . each \$2 00
3361. Triangular Boxwood Scale, 24 inches long, divided  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ , 1,  $1\frac{1}{2}$ , 2, 3 and 4 inches to the foot, and one edge  $\frac{1}{8}$  of an inch " 5 00
3362. Silver Plated Triangular Scale, 12 inches long, divided  $\frac{3}{8}$ ,  $\frac{3}{4}$ ,  $1\frac{1}{2}$ ,  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ , 1,  $1\frac{1}{2}$  and 3 inches to the foot, and one edge  $\frac{1}{8}$  of an inch " 5 00
3363. Silver Plated Triangular Scale, 12 inches long, divided  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$  and 1 inch to the foot . . . . . " 5 00
3364. Silver Plated Triangular Scale, 12 inches long, divided 10, 20, 30, 40, 50 and 60 parts to the inch . . . . . " 5 00
3365. Gunter Scale, 12 inches long . . . . . " 75
3366. " " 24 " . . . . . " 1 25
3367. Boxwood School Rule, 12 inches long,  $\frac{1}{8}$  and  $\frac{1}{16}$  inch . . . . . " 15
3368. " " " " Beveled Brass Edge,  $\frac{1}{16}$  inch . . . . . " 60
3369. Boxwood School Rule, 18 inches long . . . . . " 90

## 3370.

3370. Triangular Scale Guard . . . . . each \$0 25
3375. Paper Scales, 19 inches long,  $1\frac{3}{4}$  inches wide ; Series A,  $\frac{1}{4}$ ,  $\frac{1}{2}$ ,  
 $\frac{3}{4}$ , 1,  $1\frac{1}{2}$  and 3 inches to the foot . . . . . per set 1 00
3376. Paper Scales, Series B,  $\frac{3}{32}$ ,  $\frac{1}{8}$ ,  $\frac{3}{16}$ ,  $\frac{5}{16}$ ,  $\frac{3}{8}$ ,  $\frac{7}{8}$  of an inch to the foot " 1 00
3377. " " C, 10, 20, 30, 40, 50 and 60 parts to the  
 inch . . . . . " 1 00
3378. Paper Scales of the above series . . . . . each 20

## Standard Steel Rules.

3380. 3 inch Steel Rule, divided  $\frac{1}{8}$ ,  $\frac{1}{10}$ ,  $\frac{1}{12}$ ,  $\frac{1}{16}$ ,  $\frac{1}{20}$ ,  $\frac{1}{24}$ ,  $\frac{1}{32}$ ,  $\frac{1}{48}$ ,  $\frac{1}{50}$ ,  $\frac{1}{64}$   
 and  $\frac{1}{100}$ th of an inch . . . . . each \$0 60
3381. 4 inch Steel Rule, divided as above . . . . . " 90
3382. 6 " " " " . . . . . " 1 20
3383. 9 " " " " . . . . . " 1 80
3384. 12 " " " " . . . . . " 2 50
3385. 18 " " " " . . . . . " 3 60
3386. 24 " " " " . . . . . " 4 80
3387. Steel Shrink Rule,  $24\frac{1}{4}$  inches long, divided on each side 10, 20,  
 50, 100, 12, 24, 48, 16, 32, 64 parts of an inch . . . . . " 6 00
3388. Boxwood Shrink Rule, same divisions as above . . . . . " 3 60
3389. Steel Square, 2 inches long,  $\frac{1}{20}$  inch thick, divided 16ths and  
 64ths on one side, and 32nds and 64ths on the other side . . . . . " 1 80
3390. Steel Square, 3 inches long,  $\frac{1}{16}$  inch thick, divided as above " 2 40
3391. " 4 "  $\frac{1}{14}$  " divided 16th and  
 32nds on both sides . . . . . " 2 50
3392. Steel Square, 6 inches long,  $\frac{1}{14}$  inch thick, divided 16ths and  
 32nds on both sides . . . . . " 3 50
3393. Steel Square, 8 inches long,  $\frac{1}{12}$  inch thick, divided 16ths and  
 32nds on both sides . . . . . " 4 50
3394. Steel Square, 10 inches long,  $\frac{1}{10}$  inch thick, divided 16ths and  
 32nds on both sides . . . . . " 5 50

3395.

3395. Steel Square, with heavy head for Machinists, divided to 32ds  
 3 inch blade . . . . . each \$2 50

3396.	Same as 3395, 4 inch blade	each	\$3 00
3397.	" 6 "	"	4 00
3398.	" 9 "	"	7 00
3399.	" 12 "	"	8 00

This square combines, in the most convenient form, five different instruments ;  
**T** Square, Try Square, Mitre, Graduated Rule and the Centre Square ; Divided 12ths and 48ths on one edge and 16ths and 32nds on the other edge.

3400.	Universal Square, 4 inch blade	each	\$2 50
3401.	Universal Square, 6 inch blade	"	3 00
3402.	Universal Square, 12 inch blade	"	7 00

3403. Steel **T** Square, fixed head, 8 inches long, blade 24 inches long,  $\frac{7}{8}$  inch wide, and  $\frac{3}{4}$  inch thick . . . . . each \$6 00
3404. Steel **T** Square, fixed head, 8 inches long, blade 36 inches long,  $\frac{7}{8}$  inch wide, and  $\frac{3}{4}$  inch thick . . . . . " 7 00
3405. Steel **T** Square, with  $4\frac{1}{2}$  inch Arc, divided to half degrees, head  $8\frac{1}{4}$  inches long, blade  $1\frac{1}{4}$  inches wide,  $\frac{3}{4}$  inch thick, and 36 inches long . . . . . " 14 00

3406.

3406.	American Wire Gauge, small size	each	\$3 00
3407.	" " large "	"	4 00
3408.	Steel Triangle, 30°, 60° and 90°, 6 inch perpendicular	"	3 25

4	5	6	7	8	9	10	11	12	13	14	15	inch perpendicular.
.35	.40	.45	.55	.70	.85	\$1.00	\$1.15	\$1.25	\$1.50	\$1.75	\$2.00	each.

3449. Hard Rubber Lettering Triangles,  $3\frac{1}{2}$  inch perpendicular, 3 in

a set, per set \$1.25 . . . . . each \$0 50

## Irregular Curves.

## PATTERN A.

3450.

3450. Irregular Curves, Pattern A, Cherry or Maple; No. 1, 10 cents each; Nos. 2, 3, 4, 5, 7, 9, 11 and 12, 15 cents each; Nos. 6, 8, 10, 13, 14, 15 and 16, 25 cents each; Nos. 17, 18, 20 and 21, 30 cents each. Nos. 19, 22 and 23, 35 cents each; No. 24 and 25, 50 cents each.
3451. Irregular Curves, Pattern A, Rubber; Nos. 1, 2 and 3, 30 cents each; Nos. 4, 5, 6 and 12, 35 cents each; Nos. 7, 8, 9, 10, 11, 13, 15 and 16, 50 cents each; Nos. 14, 17 and 20, 65 cents each; Nos. 18, 19, 21 and 22, 75 cents each; Nos. 23 and 24, \$1 each; No. 25, \$1.50 each.

## PATTERN B.

3452.

3452. Irregular Curves of Hard Rubber, Pattern B; No. 1, 20 cents; Nos. 2 and 5, 35 cents each; Nos. 3, 4, 6 and 8, 40 cents each; Nos. 7, 9, 10, 11, 12, 13 and 14, 50 cents each; No. 15, 16, 18 and 22, 65 cents each; Nos. 20 and 21, 75 cents each; Nos. 17, 19 and 23, \$1 each.

# Ship Curves.

## PATTERN C.

3455.

3455. Ship Curves, Wood; Pattern C, from 24 to 51, 28 in a set,  
           in case . . . . . per set \$13 00
3456. Ship Curves, Hard Rubber; Pattern C, from 24 to 51, 28  
           in a set, in case . . . . . " 20 00

3457. Copenhagen Ship Curves, of Wood, 43 in a set, in Walnut Case . . . . . per set \$18 00
3458. Copenhagen Ship Curves, of Hard Rubber, 43 in a set, in Walnut Case . . . . . " 35 00

## Railroad Curves.

3460.

3460. Set of 10 Wood Curves, from 12 to 120 inches radius, varying 12 inches, finished on convex side only . . . . . per set \$4 25
3461. Set of 10 Hard Rubber Curves, from 12 to 120 inches radius, varying 12 inches, finished on convex side only . . . . . " 8 00
3462. Set of 43 Wood Curves, from  $3\frac{1}{2}$  to 200 inches radius, Varying  $\frac{1}{2}$  in. from  $3\frac{1}{2}$  to 10 inches. Varying 6 in. from 43 to 90 inches

Full Rolls only of 70 to 100 pounds sold at the pound rates.

## Profile Paper.

The Profile Papers offered are the best that can be made, being printed from the most correct rollers and on better quality paper than was ever offered, standing erasing very well, and also taking the ink after erasing without running.

These Papers are printed in Orange and Green.

3560.

3560. Profile Paper, Plate A, in sheets, ruled 15 x 42 inches ; horizontal divisions 4 to the inch, vertical divisions 20 to the inch ; with every tenth horizontal and every fiftieth vertical division line ruled heavier than the others, per sheet, 40 cents . . . . . per quire \$8 50
3561. Profile Paper, Plate AA. In sheets, ruled 6½ x 42 inches, with same divisions as 3560, per sheet 30 cents . . . . . " 6 50

## 3562.

3562. Profile Paper, Plate B. In sheets, ruled 13 x 42 inches ; horizontal divisions 4 to the inch, vertical divisions 30 to the inch ; with every fourth horizontal and every twenty-fifth vertical division line ruled heavier than the others, per sheet, 40 cents . . . . . per quire \$8 50
3563. Profile Paper, Plate B. In sheets, ruled  $6\frac{1}{2}$  x 42 inches with same divisions as 3562, per sheet, 30 cents . . . . . " 6 50
3564. Profile Paper, Plate C. In sheets, ruled 15 x 42 inches ; horizontal divisions 5 to the inch, vertical divisions 25 to the inch ; with every fifth horizontal and every twenty-fifth vertical line ruled heavier than the others, per sheet, 40 cents . . . . . " 8 50

# STAR ★ ★ ★ BRAND. "VICTORINE."

## MEDIUM COLD PRESSED DETAIL PAPER.

The Victorine Detail has a surface similar to the best White Drawing Paper. It acts well under the rubber ; India Ink and Water Colors do not spread, and the cold pressed surface displays Pencil or Crayon to a better advantage than any smooth Detail Paper.

100 yd. roll, 48 in. wide, \$7 75	100 yd. roll, 40 in. wide, \$7 75

## PREPARED SENSITIVE PAPER,

### FOR COPYING DRAWINGS :

To use the Sensitive Paper, first procure a printing frame, lay the drawing face down upon the glass, on which place the Sensitive Paper, prepared side down, then several thicknesses of cotton flannel for a pad ; if on turning the frame over any wrinkles appear open the hinged back and place a piece of paper in order to press them out (this should be done in a darkened room), then expose to the sunlight for five or ten minutes, depending on the clearness of the day, remove and examine in a dark room by opening the back of the frame, if the lines are slightly turned in color it has been done properly, remove it and wash in clear water with two or three changes, then dry it.

The paper must be kept in perfect *darkness* until used.

3830.

3836.

3830. Miners' Compass, for tracing iron ore. This consists of a dipping needle 2½ inches long, mounted in a brass ring graduated from 0° to 180° in each direction, and having plate glass top and bottom. When used for tracing ore, the prospector should hold the ring in his hand and keep the needle north and south, standing with his face to the west . . . . . each \$12 00
3831. Meridian Finder or Miners' Compass, 3½ inches in diameter. The advantage of this Compass is that the needle has a motion in Azimuth as well as in Altitude, thus insuring the needle finding its true Meridian. Also that the needle is suspended in such a way that it turns easily, with nothing to impede its revolution, by this means you have perfect test in reversing the needle. Another advantage is that the

needle is, and can be made more sensitive than other needles  
of this kind . . . . . each \$12 00

object ends ; and with one end of its axis adjustable ; slide for closing aperture in cap, when not in use ; shifting *tripod* head to tripod, for precisely centering the instrument over a point, after approximately centering with tripod legs ; extra wide openings in vernier plate for reading the horizontal limb ; tripod head with the leveling screws, etc., detachable both from the instrument and from tripod legs, for packing in the box ; length of telescope  $10\frac{3}{4}$  inches, diameter of the object-glass  $1\frac{3}{4}$  inches . . . . . price \$220 00

This instrument is securely packed in a mahogany box with leather straps, hooks, lock and key. India rubber washers in the box to prevent jarring in transportation ; a lens for reading verniers, camel-hair brush, sunshade for telescope, 2 screw-drivers and plummet.

3851. Plain Transit—similar to the above in every respect, except that it has no level, vertical arc, clamps or tangent screw motions to the axis of the telescope . . . . . each \$185 00
3852. Small Mining and Reconnoissance Transit, with level, vertical arc, etc., similar to the Combined Transit excepting in size and weight . . . . . “ 198 00  
*A full description of this excellent instrument will be sent when desired.*
3853. Tunnel Transit, with 17 inch telescope, long compound centres, 5 inch needle, double opposite verniers to horizontal limb . . . . . “ 298 00
3854. Lyman's Solar Transit. This is our complete combined transit and level instrument, with the addition of variation plate, stadia hairs, and the solar apparatus underneath the main plates ; all the graduations on silver plate. Price, securely packed . . . . . “ 300 00

3855.

3855. Engineers' Y-Level. with long centre, telescope, bar and centres arranged in such a manner as to detach above the leveling screws, without the possibility of jarring the instrument or its adjustments; tripod head with leveling screws detachable from the tripod legs, for packing in the box; telescope 17 inches long, erecting, achromatic and extra powerful; index arrangement on telescope and Y's for setting vertical hairs truly vertical. Packed in a mahogany box with sunshade, adjusting pins, etc.  
Price . . . . . each \$145 00
3856. Small Mining and Reconnoissance Level is a companion to No. 3852, and a fac-simile of our Engineers' Y-Level in every respect except size and weight; telescope  $10\frac{3}{4}$  inches, object-glass 1 inch in diameter; magnifying power 28 diameters, and will read leveling rod without target at a distance of 700 feet; it weighs  $2\frac{1}{2}$  pounds without the tripod; the tripod head of the Reconnoissance Transit will exactly fit this instrument. Packed in a box with strap to carry it on the shoulder like a field-glass. Price without tripod " 105 00  
With tripod . . . . . " 115 00
3857. Plain Transit. Needle,  $4\frac{1}{2}$  inches long. Outside Verniers to plates, reading to one minute. Vertical adjustment to Telescope. Tangent to plates. Graduations  $6\frac{1}{4}$  inches. Telescope giving a power of 20 diameters. Weight of the Instrument, plain, 19 pounds . . . . . " 155 00
3858. Plain Transit. Needle 5 inches long. Two Verniers reading to minutes. Tangent to plates. Two straight Levels. Shifting Tripod. Improved Eye Piece. Slide Protector and Tangent. Telescope giving a power of 20 diameters. Graduations  $4\frac{3}{4}$  inches. Weight of Instrument, plain,  $17\frac{1}{2}$  pounds " 160 00
3859. Plain Transit. Needle  $4\frac{1}{2}$  inches long. Long Centre. Two outside verniers, reading to minutes. Tangent to plates. Vertical adjustment to Telescope. Improved attachment to Tripod. Improved Eye Piece. Slide Protector and Tangent. Telescope having a power of 20 diameters. Weight of Instrument,  $19\frac{1}{2}$  pounds . . . . . " 190 00
3860. Level to Telescope, with Tangent, to any of the above Instruments . . . . . " 25 00
3861. Vertical Arc to Telescope of any of the above . . . . . " 15 00
3862. Graduations to read to 20 or 30 seconds . . . . . " 10 00
3863. Stadia Hairs fixed . . . . . " 3 00

# AURORA Blue Print Paper.

(NOT PREPARED,)

An excellent paper for Blue Print Process; it is uniform in thickness and weight. Those preferring a smooth surface paper will find this the best in use.

# “DETALIA.”

“Detalia” is a new article for Drawing purposes. Slightly buff, is less trying to the eyes than ordinary colors. It is very tough, and even in finish, will bear rubbing and is unsurpassed for erasing; it may be erased and drawn upon and again erased without any important deterioration of the surface. It is the best paper in the market to-day for Engineer, Surveyor or Architect use.

4125. Mercurial Barometer, Plain Walnut Case, 40 inches long, with Thermometer . . . . . each \$ 8 00
4126. Mercurial Barometer, Plain Ash, round, with Thermometer " 10 00
4127. Mercurial Barometer, Polished Walnut Case, 36 inches long, with Hygrometer . . . . . " 18 00
4128. Mercurial Barometer, Polished Rosewood Case, 36 inches long, Thermometer on the outside . . . . . " 20 00

## Anemometers.

4150. Pocket Anemometer, for finding the velocity of the wind in Mines,  $2\frac{1}{2}$  inches in diameter, registering to 100 feet, without stop, in leather case . . . . . each \$25 00
4151. Pocket Anemometer, for finding the velocity of the wind in Mines,  $4\frac{1}{4}$  inches in diameter, registering to 100 feet, without stop, in wood box . . . . . " 25 00
4152. Anemometer, for finding the velocity of the wind,  $6\frac{3}{4}$  inches in diameter, registering to Ten Million (10,000,000) feet, with stop, in leather case . . . . . " 35 00

4153.

4153. Anemometer, for finding the velocity of the wind,  $2\frac{3}{4}$  inches in diameter, registering to Ten Million (10,000,000) feet, with stop, in wood box . . . . . each \$35 00
4154. Anemometer, for finding the velocity of the wind,  $2\frac{3}{4}$  inches in diameter, with minute glass stop, registering to 1000 feet, for very accurate measurement, in wood box . . . . . " 35 00
4155. Anemometer, for finding the velocity of the wind,  $2\frac{3}{4}$  inches in diameter, with minute glass stop, registering to Ten Million (10,000,000) feet, for very accurate measurement, in wood box . . . . . " 40 00

## Scientific Books.

### ARCHITECTURE, CARPENTRY AND BUILDING.

ABERDEEN.—Grecian Architecture. By Earl of Aberdeen. (Weale's series) . . . . .	\$0 40
ALLEN.—Cottage Building. By C. B. Allen. (Weale's series) . . . . .	60
ALLEN.—Rural Architecture; being a Complete Description of Farm-Houses, Cottages and Out-Buildings. By L. F. Allen. 12mo. . . . .	1 50
ARCHITECT'S (The) Guide; or, Office and Pocket Companion, for Architects, Engineers, &c. By W. D. Haskoll, G. Rennie, F. Rogers and P. Thompson. 1 vol., 16mo, cloth. . . . .	1 50
ATWOOD'S Country and Suburban Residences. . . . .	1 50
——— Modern American Homesteads. 46 plates. . . . .	3 50
AUSTIN.—A Practical Treatise on Calcareous and Hydraulic Limes and Cements. By J. G. Austin. 1 vol., 12mo, cloth. London, 1862. . . . .	2 00
BARNARD.—School Architecture. By Henry Barnard. 3d edition. 1 vol., 8vo, cloth. New York, 1849. . . . .	2 00
BAUMAN.—The Art of Preparing Foundations for all kinds of Buildings. By Frederick Bauman . . . . .	75
BELL.—Carpentry Made Easy. By F. W. Bell. 1 vol., 8vo. . . . .	5 00
BICKNELL'S Public Buildings . . . . .	3 50
——— Street, Store and Bank Fronts. . . . .	4 00
——— School-House and Church Architecture. . . . .	3 00
——— Stables, Out-Buildings, Fences, etc. . . . .	2 50
——— Specimen Book of 100 Architectural Designs. . . . .	1 00
BICKNELL'S Village Builder.—Elevations and Plans for Cottages, Villas, Suburban Residences, Farm-Houses, Stables and Carriage-Houses, Stone Fronts, School-Houses, Churches, Court-Houses, and a Model Jail. 4to. New edition, with supplement. . . . .	10 00
——— Detail, Cottage and Constructive Architecture: Containing 75 large Lithographic Plates, showing a great variety of Designs for Cornices, Brackets, Windows and Window Caps, Doors, Piazzas, Porches, Bay and Dormer Windows, Observatories, Towers, Chimney Tops, Balconies, Canopies, Scrolls, Gable and Sawed Ornaments, Fences, Stairs, Newels, Architraves, Mantels, Plaster Finish, etc., including 45 Perspectives, Elevations, and Plans of Modern Designs for Cottages, with Details, and 18 Elevations of Summer Houses, Villas, Seaside Cottages, and Country Houses, together with 14 Designs for Street and Store Fronts, with Inside Finish for Stores and Banks; also, Framing for Dwellings, Barns, Exhibition Buildings, Roofs, Bridges, etc., etc., making in all a Practical Book for Architects, Builders, Carpenters, and all who contemplate Building or Remodeling Wood, Stone, or Brick Buildings. One large quarto volume . . . . .	10 00

BOWLER.—Chapel and Church Architecture, with Designs for Parsonages. By Rev. G. Bowler. Folio, illustrated. . . . .	\$10 00
BROOKS.—Erection of Dwelling Houses, with Specifications, Quantities of Materials, &c. 27 plates. By S. H. Brooks. (Weale's series)	1 00
BULLOCK.—The American Cottage Builder: A series of Designs, Plans and Specifications, from \$200 to \$20,000, for Homes for the People; together with Warming, Ventilation, Drainage, Painting, and Landscape Gardening By John Bullock, Architect, Civil Engineer, Mechanician, and Editor of "The Rudiments of Architecture and Building," etc., etc. Illustrated by 75 engravings. In 1 volume, 8vo. . . . .	3 50
BURN.—Model Designs for Mansions, Villas, Cottage Residences, Park Entrances and Lodges, being Plans, Elevations, Sections, Detailed Drawings, and Descriptive Specifications. Arranged by Robert Scott Burn. 1 vol., 4to, half morocco . . . . .	15 00
BURNELL.—Rudimentary Treatise on Limes, Cements, Mortars, Concretes, Mastics, Plastering, &c. By Geo. R. Burnell. Fifth edition, with Appendices. (Weale's series) . . . . .	60
BURY.—Styles of Architecture. By T. Bury. (Weale's edition) . . . . .	80
CAMPIN.—On the Construction of Iron Roofs, a Theoretical and Practical Treatise. By Francis Campin, C. E. With wood-cuts and plates of roofs lately executed. Small 4to, cloth. New York, 1868. . . . .	2 00
CARPENTERS' and Builders' Guide . . . . .	1 00
CLEVELAND AND BACKUS.—Cottage and Farm Architecture . . . . .	4 00
CROFF.—Model Suburban Architecture, embodying Designs for Dwellings of Moderate Cost, together with elaborate and extensive Villas, &c., &c. By C. B. Croff, Architect. 1 vol., 4to. 1870. . . . .	5 00
CROFT'S Designs for Front Entrance Doors. 22 large plates. . . . .	5 00
CUPPER.—The Universal Stair-BUILDER; being a New Treatise on the Construction of Stair-Cases and Hand-Rail. By R. A. Cupper. 4to. . . . .	7 50
DEAN.—A series of selected designs for Country Residences, Entrance Lodges, Farm Offices, Cottages, etc. By G. A. Dean. With numerous colored plates. 4to. London . . . . .	21 00
DE GRAFF.—The Modern Geometrical Stair-BUILDER's Guide. By S. De Graff, Architect. 4to, Illustrated. Philadelphia, 1868. . . . .	5 00
DICTIONARY of Terms used by Builders, Architects, &c. (Weale's series) . . . . .	2 00
DOBSON.—Brick and Tile Making. By E. Dobson. New edition, revised by Robert Mallet. London, 1868. (Weale's series) . . . . .	1 20
——— The Art of Building. By E. Dobson. (Weale's series) . . . . .	60
——— The Student's Guide to the Practice of Measuring and Valuing Artificers' Works. Edited by E. Dobson. 3d edition, with the additions on design by E. Lacy Garbett. 8vo, cloth, illustrated. London, 1858 . . . . .	4 50
——— Masonry and Stone Cutting. By E. Dobson. (Weale's series)	1 00

—— Foundations and Concrete Works. By E. Dobson. (Weale's series)	\$ 60
DOWNING.—Cottage Residences. By A. J. Downing. 4to, cloth.	6 00
—— Hints to Persons about Building in the Country. By A. J. Downing. New York, 1868.	2 00
—— A Treatise on Landscape Gardening and Rural Architecture, by the late A. J. Downing, with Supplement by H. W. Sargent. 1 vol. thick. 8vo, cloth. Finely illustrated.	6 50
EASSIE.—Healthy Houses. A Hand-Book of the History, Defects, and Remedies of Drainage, Ventilation, Warming, and Kindred Subjects. With 300 illustrations. By William Eassie, C. E. 12mo, cloth. New York, 1872.	1 00
FAIRBAIRN.—The Application of Cast and Wrought Iron to Building Purposes. By William Fairbairn, C. E. 3d edition. New York, 1864. Illustrated. 1 vol., 8vo, cloth.	2 00
HALLETT's Builder's Specifications.	1 75
—— Builder's Contracts.	10
HATFIELD.—The American House-Carpenter. By R. G. Hatfield. 7th edition. 8vo, cloth. New York, 1869.	3 50
HIBBARD.—Rustic Adornments for Homes of Taste. By Shirley Hibbard. New edition, revised, corrected, and enlarged. With colored plates and 230 wood-cuts. 1 vol., small 4to. London, 1870.	8 00
HOLLEY.—Country Seats, containing Designs for Cottages, Villas, Mansions, &c. By H. H. Holley. 1 vol., 4to. New York, 1866.	5 00
—— Church Architecture. Illustrated with 35 lithographic plates. By H. H. Holley.	10 00
HOLLY.—Carpenters' and Joiners' Hand Book. By W. Holly. 1 vol., 18mo, cloth. New York, 1868.	75
HURST.—A Hand-Book for Architectural Surveyors and others engaged in Building: Containing Formulæ Useful in Designing Builder's Work, Table of Weights, of the Materials used in Building, Memoranda connected with Builder's Work, Mensuration, the Practice of Builder's Measurement, Contracts of Labor, Valuation of Property, Summary of the Practice in Dilapidation, etc., etc. By J. F. Hurst, C. E. 2d edition, pocket-book form, full bound.	2 00
HUSSEY's National Cottage Architecture.	6 00
LEEDS.—Orders of Architecture. By W. H. Leeds. (Weale's series).	60
MITCHELL.—A Rudimentary Manual of Architecture, being a History and Explanation of the Principal Styles of European Architecture, Ancient, Mediæval, and Renaissance, &c., &c., to which is appended a Dictionary of Terms. By Thomas Mitchell. 1 vol., 12mo, cloth, illustrated. London, 1870.	5 00
—— Stepping-Stones to Architecture, consisting of a Series of Questions and Answers, explaining the Principles of Architecture. By Thomas Mitchell. 1 vol. London, 1869.	50

NICHOLSON.—Carpenters' New Guide. By P. Nicholson. Revised by K. N. Davies, and containing New Designs for Roofs, Domes, &c. By S. Sloan. 4to. Philadelphia, 1860. . . . .	\$ 4 50
PARKER.—An Introduction to the Study of Gothic Architecture. By J. H. Parker, F.S.A. 3d edition, revised and enlarged. 8vo. . . . .	2 50
— Gothic Ornaments selected from Various Ancient Buildings, both in England and France, during the years 1828, 1829 and 1830. By A. Pugin, Architect. 1 vol., 4to. London, 1844 . . . . .	15 00
PYNE.—Practical Rules on Drawing, for the Operative Builder and Young Student in Architecture. By George Pyne. 1 vol., 4to. London, 1864 . . . . .	3 75
RICHARDSON.—Architectural Modeling. By P. A. Richardson. (Weale's series) . . . . .	60
RIDDELL.—Architectural Designs for Model Country Residences, illustrated by Colored Drawings of Elevations and Ground Plans, accompanied by General Descriptions. By J. Riddell. 1 vol., oblong 4to . . . . .	15 00
SHAW.—Civil Architecture ; being a Complete Theoretical and Practical System of Building, containing the Fundamental Principles of the Art. By Edward Shaw. To which is added a Treatise on Gothic Architecture, &c. By T. W. Silloway and George M. Harding, Architects. Illustrated by 103 plates, engraved on copper. 1 vol., 4to. Philadelphia, 1870 . . . . .	10 00
— American Houses ; A variety of Original Designs for Rural Buildings. Illustrated by 26 colored engravings, with descriptive references. By Samuel Sloan, Architect, author of the "Model Architect," &c., &c. 8vo. . . . .	2 50
— The Model Architect. A series of Designs for Cottages, Villas, Suburban Residences, &c. Plates. By S. Sloan. 2 vols., 4to. . . . .	18 00
SMEATON.—The Builder's Companion. By A. C. Smeaton. Illustrated 16mo. . . . .	1 50
TARN.—The Science of Building. An Elementary Treatise on the Principles of Construction. By E. W. Tarn. 1 vol., 8vo. Illustrated with 47 wood-engravings. London, 1870 . . . . .	3 50
VITRUVIUS's Architecture. Translated by J. Gwilt. (Weale's series) . . . . .	2 00
WHEELER.—Rural Homes ; or, Sketches of Houses suited to American Country Life, with Original Plans, Designs, &c. By Gervaise Wheeler. 1 vol., 12mo, cloth. New York, 1868. . . . .	2 00
WIGHTWICK.—Hints to Young Architects : Comprising advice to those who, while yet at school, are destined to the Profession ; to such as, having passed their pupilage, are about to travel ; and to those who, having completed their education, are about to practice. Together with a Model Specification involving a great variety of instructive and suggestive matter. By George Wightwick, Architect. A new Edition, revised and considerably enlarged ; comprising Treatises on the Principles of Construction and Design. By G. Huskisson Guillaume, Architect. Numerous illustrations. 1 vol., 12mo. . . . .	2 00

WOODWARD.—The National Architect. By George E. Woodward and Edward G. Thompson. 1 vol., 4to. New York, 1869. . . .	\$12 00
——— Country Homes. By George E. and F. W. Woodward, Architects. 8th edition, revised and enlarged. 1 vol., 12mo, cloth . . .	1 50
——— Architecture and Rural Art. By George E. Woodward, No. 1, 1867. 1 vol., 12mo, cloth. New York . . . . .	1 50

## DRAWING AND PAINTING.

BRADLEY.—Practical Geometry, Linear Perspective and Projections, including Isometrical Perspective Projections of the Sphere, and the Projection of Shadows. By Thomas Bradley. Illustrated. 1 vol., 8vo., cloth. London, 1846 . . . . .	2 50
BURCHETT.—Linear Perspective, for the Use of Schools of Art. By R. Burchett. 1 vol., 12mo, cloth. London, 1867 . . . . .	3 50
BURN.—The illustrated Drawing Book, for the use of Schools, Students, and Artisans ; containing Pencil Drawing, Figure and Art, Perspective Engraving ; with upwards of 300 illustrations. By Robert Scott Burn. 1 vol., 8vo. London, 1869 . . . . .	1 00
——— Ornamental Drawing and Architectural Design ; with Notes, Historical and Practical. By Robert Scott Burn. Upwards of 300 illustrations. 1 vol., 8vo, cloth. London . . . . .	1 00
——— The Illustrated Architectural Engineering and Mechanical Drawing Book. By Robert Scott Burn. 1 vol., 8vo, cloth. London, 1853. . . . .	1 00
CHAPMAN.—American Drawing Book ; a Manual for the Amateur, and Basis of Study for the Professional Artist. By J. G. Chapman. New edition, illustrated, 4to. New York, 1870 . . . . .	6 00
COPLEY.—A set of Alphabets of all the Various Hands of Modern Use, with Examples in each Style ; also, the Mechanical and Analytical Construction of Letters, Figures, and Titles. Drawn and arranged by Frederick S. Copley. 1 vol., oblong. New York, 1870 . . . . .	3 00
——— Linear Drawing, showing the application of Practical Geometry to Trade and Manufactures. By E. A. Davidson. 12mo., cloth. London, 1869. . . . .	1 00
DAVIES.—A Treatise on Shades and Shadows, and Linear Perspective. By C. Davies. 1 vol., 8vo. . . . .	3 75
HARDING.—Drawing Models and their Uses. By J. D. Harding. 5th edition, 12mo, paper. Illustrated, London . . . . .	50
HEATHER.—A Treatise on Mathematical Instruments. By T. F. Heather. 8th edition. (Weale's series) . . . . .	60
JOHNSTON.—The Practical Draughtsman's Book of Industrial Design and Machinists' and Engineers' Drawing Companion. By Wm. Johnston. 4to, illustrated. . . . .	10 00
KENTISH.—Treatise on a Box of Instruments and the Slide Rule. By Thos. Kentish. Illustrated. 12mo, cloth. . . . .	1 25

# STAR ★ BRAND. "VICTORINE."

## THICK COLD PRESSED DETAIL PAPER.

The Victorine Detail has a surface similar to the best White Drawing Paper. It acts well under the rubber; India Ink and Water Colors do not spread, and the cold pressed surface displays Pencil or Crayon to a better advantage than any smooth Detail Paper.

100 yd. roll, 48 in. wide, \$7 75

LAING.—Manual of Illumination on Paper and Vellum. By J. W. Bradley, B.A., and T. G. Goodwin, B.A. 7th edition, revised and enlarged, and with practical notes. By J. J. Laing. 12mo, paper. London, 1869 . . . . .		\$ 50
—— A Companion to the Manual of Illumination. Drawn by J. J. Laing. 12mo, paper. London, 1867 . . . . .		50
MAHAN.—Industrial Drawing; comprising the Description and Uses of Drawing Instruments, &c. By D. H. Mahan. 1 vol. 8vo, cloth.		3 00
MINIFIE (Wm.)—Mechanical Drawing. A Text-Book of Geometrical Drawing, for the Use of Mechanics and Schools, in which the Definitions and Rules of Geometry are familiarly explained; the Practical Problems are arranged from the most simple to the more complex, and in their description technicalities are avoided as much as possible. With Illustrations for Drawing Plans, Sections, and Elevations of Buildings and Machinery; an Introduction to Isometrical Drawing, and an Essay on Linear Perspective and Shadows. Illustrated by over 200 diagrams, engraved on steel. With an Appendix on the Theory and Application of Colors. 1 vol., 8vo, cloth. 7th edition. 1867. . . . .		4 00
—— Geometrical Drawing, Abridged from the octavo edition, for the Use of Schools. By Wm. Minifie. Illustrated with 48 steel plates. 5th edition. 1 vol., 12mo . . . . .		2 00
ORNAMENTAL and Early English Alphabets, Initial Letters, &c., for Engravers, Designers, Marble Masons, Painters, Decorators. 1 vol. 8vo, cloth . . . . .		3 00
RUSKIN.—Lectures on Architectures and Painting. By John Ruskin. Plates. 12mo . . . . .		1 50
—— Elements of Perspective; arranged for the Use of Schools. By John Ruskin. Illustrated. 12mo . . . . .		1 00
—— Elements of Drawing; in Three Letters to Beginners. By John Ruskin. Illustrated 12mo . . . . .		1 00
SIMMS.—A Treatise on Mathematical Instruments employed in Surveying, Leveling, and Astronomy. By F. W. Simms. 1 vol., 12mo.		1 75
SMITH.—A Manual of Topographical Drawing. By R. S. Smith. 1 vol., 8vo. Plates . . . . .		2 00
—— Manual of Linear Perspective. By R. S. Smith. 1 vol., 8vo. .		2 00
STANLEY.—A Descriptive Treatise on Mathematical Drawing Instruments, their Construction, Uses, Qualities, Selections, Preservation, and Suggestions for Improvement; with Hints upon Drawing and Coloring. By Wm. Ford Stanley. 1 vol., 12mo, cloth. London, 1866 . . . . .		2 50
WARREN.—Manual of Elementary Geometrical Drawing, involving Three Dimensions. By S. E. Warren. Plates. 12mo, cloth .		1 50
—— A Manual of Drafting Instruments. By S. E. Warren . .		1 25
—— A Manual of Linear Perspective. By S. E. Warren . . .		1 00
—— Plane Problems in Elementary Geometry. By S. E. Warren		1 25

- General Problems of Shades and Shadows. By S. E. Warren . \$ 3 50
- Elements of Machine Construction and Drawing, or Machine Drawing. By S. Edward Warren, C.E. 1 vol., 8vo, with vol. of plates. New York, 1870 . . . . . 7 50
- WILME.—A Hand-Book for Plain and Ornamental Mapping, Engineering, and Architectural Drawing. By B. P. Wilme. 2d edition. London, 1863. 1 vol., 4to, half morocco. Plates, colored (scarce)

### ENGINEERING, MACHINERY, AND MECHANICS.

- AINSLIE.—A Treatise on Land Surveying. By John Ainslie. A new and enlarged edition, embracing Railway, Military, Marine and Geodetical Surveying. By Wm. Galbraith. 1 vol., 8vo, and atlas, cloth. . . . . 10 50
- ALLAN.—Theory of Arches. By Prof. W. Allan. 18mo, stiff paper boards. New York, 1874 . . . . . 50
- APPLETON'S Dictionary of Mechanics, Machines, Engine Work, and Engineering. Containing over 4000 Illustrations, and nearly 2000 pages. 2 vols., 8vo, half morocco. New York, 1869. . . . . 18 00
- AUCHINCLOSS.—Link and Valve Motions. By W. S. Auchincloss. Sixth Edition. 8vo, cloth . . . . . 3 00
- AUSTIN.—A Practical Treatise on Calcareous and Hydraulic Limes and Cements. By J. G. Austin. 1 vol., 12 mo, cloth. London, 1862 . . . . . 2 00
- BAKER.—Diagrams. Giving Weights of Iron Girders up to 200 feet span. By B. Baker. London, 1866 . . . . .
- Land and Engineering Surveying. By T. Baker. (Weale's series) . . . . . 80
- Railway Engineering; or, Field-Work Preparatory to the Construction of Railways. 1 vol., 8vo. By T. Baker. . . . . 2 50
- Long-Span Railway Bridges. By B. Baker. (Reprinted from Engineering, revised and extended.) 1 vol., 12mo, cloth. London, 1873. . . . . 2 00
- On the Strength of Beams, Columns, and Arches, considered with a view to deriving methods of ascertaining the Practical Strength of any given Section of the Beam, Column or Arch; in Cast-Iron, Wrought Iron or Steel. 1 vol., thick 12mo, cloth, illustrated. London, 1870 . . . . . 3 50
- BARLOW.—On the Strength of Materials. Revised by the Author's Sons, P. W. and W. H. Barlow, with numerous and important additions. Edited by Wm. Humber, C.E. New edition, with new plates, and enlarged, 1 vol., 8vo, cloth. . . . . 9 00
- BASHFORTH.—A Practical Treatise on the Construction of Oblique Bridges, with Spiral and with equilibrated courses, with 12 plates. By F. Bashforth, M.A. 8vo, cloth . . . . . 4 50
- BLAND.—Arches, Piers, and Buttresses. By W. Bland. (Weale's series). . . . . 60

BOILLAU.—A New and Complete Set of Traverse Tables, showing the differences of latitudes and the departures to every minute of the quadrant, and to five places of decimals, &c., &c. By Capt. J. T. Boillau. 1 vol., 8vo, cloth. New edition. . . . .		\$ 6 00
BURNELL and LAW.—Civil Engineering. By G. R. Burnell and H. Law. (Weale's series) . . . . .		2 00
BURR.—Instructions in Practical Surveying, Typographical Plan Drawing, and Sketching Ground without Instruments. 4th edition. By Geo. D. Burr. 1 vol., 12mo, cloth . . . . .		3 00
BYRNE.—Pocket-Book for Railroad and Civil Engineers; containing New, Exact, and Concise Methods for Laying out Railroad Curves, Switches, &c. Illustrated. 1 vol., 18mo. By Oliver Byrne . . . . .		1 75
———The Hand-Book for the Artisan, Mechanic, and Engineer. Illustrated. 1 vol., 8vo. By Oliver Byrne . . . . .		5 00
———The Practical Model Calculator, for the Engineer, Mechanic, Manufacturer of Engine-Work, Naval Architect, Miner, and Millwright. 8vo. By Oliver Byrne . . . . .		4 50
———The Essential Elements of Practical Mechanics, based on the principle of work designed for Engineering Students. By Oliver Byrne. Philadelphia, 1868. 1 vol., 12mo, cloth . . . . .		2 50
CLARK.—A Manual of Rules, Tables and Data for Mechanical Engineers, based on the most recent investigations. By D. K. Clark. Illustrated with numerous diagrams. One large octavo volume. Cloth . . . . .		7 50
COLBURN.—Locomotive Engineering, and the Mechanism of Railways. By Zerah Colburn. 2 vols., cloth. London, 1871. . . . .		16 00
CRESY.—An Encyclopedia of Civil Engineering. By E. Cresy. 1 vol. 8vo. Illustrated . . . . .		16 80
CROSS.—Engineer's Field Book. By C. S. Cross, C. E. 1 vol., 12mo, cloth. New York, 1855 . . . . .		1 50
DAVIES.—Elements of Surveying and Levelling. By Charles Davies. Revised edition. 12mo, sheep. New York, 1870. . . . .		2 50
DEMPSEY.—The Practical Railway Engineer. By G. Drysdale Dempsey, C.E. 4th edition, revised. 1 vol., 4to, cloth . . . . .		26 25
———Tubular and Iron Girder Bridges including the Britannia and Conway Bridges. By G. D. Dempsey. (Weale's series) . . . . .		60
———Working Drawings of Stations, Engine Houses, Manufactories, Warehouses, Workshops, &c., &c. By G. D. Dempsey, C.E. Text 4to, plates folio, paper. London, 1856 . . . . .		26 25
DIX.—A Treatise on Land Surveying. By Thomas Dix. 1 vol., 8vo, boards. London, 1808 . . . . .		3 00
DUNCAN.—Practical Surveyor's Guide. By Andrew Duncan. Illustrated. 12mo, cloth . . . . .		1 25
ENGINEERS' and Machinists' Drawing-Book. A Complete Course of Instruction for the Practical Engineer. Illustrated with numerous engravings. 1 vol., 4to, half morocco . . . . .		21 00

FAIRBAIRN.—On the Application of Cast and Wrought Iron to Building Purposes. By Wm. Fairbairn, C. E. 8vo, cloth. . . . .	\$ 2 00
FENWICK.—Subterraneous Surveying, and Ranging the Line without the Magnet. By T. Fenwick. With Additions by T. Baker. (Weale's series) . . . . .	1 00
GILLESPIE.—Practical Treatise on Surveying. By W. M. Gillespie. 1 vol., 8vo. Illustrated . . . . .	3 00
——— Manual of the Principles and Practice of the Road-Making. By W. M. Gillespie. 1 vol., 12mo, cloth. 10th edition, enlarged . . . . .	2 50
——— A Treatise on Levelling, Topography, and Higher Surveying. By Wm Gillespie, LL.D. Edited by Cady Staley, A.M. 8vo, cloth. Illustrated. New York, 1870 . . . . .	2 50
GRISWOLD.—Railroad Engineers' Pocket Companion. By W. Griswold. 12mo, tucks. . . . .	1 75
HASKOLL.—Railway Construction, for the Use of the Engineer, Constructor, and Student; describing the Most Recent and Approved Methods for the Complete Formation of a Railway. By W. D. Haskoll, C.E. 2 vols., imperial 8vo. Illustrated. . . . .	26 25
——— Engineers' Mining, Surveyors' and Contractors' Field Book. By W. Davis Haskoll. London, 1866. 1 vol., 12mo, cloth . . . . .	6 00
HASLETT.—The Mechanics', Machinists', and Engineers' Practical Book of Reference. By C. Haslett. 16mo, tucks . . . . .	2 50
HASWELL.—Engineers' and Mechanics' Pocket-Book. By C. H. Haswell. 2d edition, revised and enlarged to 663 pages. Tucks, . . . . .	3 00
——— Mechanics' Tables. By C. H. Haswell . . . . .	1 00
HAUPT.—Theory of Bridge Construction; with practical illustrations. By H. Haupt. 8vo. . . . .	3 50
HENCK.—Field-Book for Railroad Engineers. By J. B. Henck. Tucks. . . . .	2 50
MAHAN.—An Elementary Course of Civil Engineering. By D. H. Mahan. 8vo, cloth. . . . .	5 00
MARTIN.—Screw-Cutting Tables for the use of Mechanical Engineers, showing the proper arrangement of Wheels for cutting the threads of screws of any required pitch. By W. A. Martin, Engineer. Royal 8vo, oblong, cloth. . . . .	50
MINIFIE.—Text-Book of Mechanical Drawing. By Wm Minifie. 8vo, cloth . . . . .	4 00
MOLESWORTH.—Pocket-Book of Useful Formulæ, and Memoranda for Civil and Mechanical Engineers. By G. L. Molesworth. 1 vol., 32mo, oblong, morocco, gilt . . . . .	2 00
NYSTROM.—Pocket-Book of Mechanics and Engineering. By J. W. Nystrom. 11th edition, revised and enlarged . . . . .	3 50
POOR.—Manual of the Railroads of the United States for 1876-77, showing their mileage, stock, bonds, costs, earnings, expenses, and organizations, &c. By H. V. Poor. 1 vol., 8vo. New York, 1877 . . . . .	5 00

- RANKINE.**—Civil Engineering, comprising Engineering Surveys, Earth-work, Foundations, Masonry, Carpentry, Metal-works, Roads, Railways, Canals, Rivers, Water-works, Harbors, &c., with numerous tables and illustrations. By Wm. J. M. Rankine, C. E. 6th edition. 1 vol., crown, 8vo. London, 1869 . . . \$ 6 50
- Useful Rules and Tables for Architects, Builders, Carpenters, Coach-builders, Engineers, Founders, Mechanics, Ship-builders, Surveyors, Typefounders, Wheelwrights, &c., &c. By Wm. J. M. Rankine, C. E. 4 vol., post 8vo, cloth. London, 1866 . . . 3 50
- ROEBLING.**—Long and Short Span Railway Bridges. By John A. Roebling. With fine Copper-plate Engravings, and Steel Portrait of Author. Large folio, cloth. New York, 1869 . . . 25 00
- ROPER.**—Hand Book of the Locomotive. Including the construction, running, and management of Locomotive Engines and Boilers. With Illustrations. By Stephen Roper, Engineer. Full bound, tucks . . . 2 50
- SCRIBNER.**—Engineers', Contractors' and Surveyors' Pocket Table-Book. By J. M. Scribner. 18mo, tucks . . . 2 00
- Mechanics' Companion. By J. M. Scribner. 18mo, tuck . . . 2 00
- SHUNK.**—A Practical Treatise on Railway Curves, and Location for Young Engineers. By W. F. Shunk . . . 2 00
- SIMMS.**—A Treatise on the Principles and Practice of Levelling. By F. W. Simms, C. E. 5th edition, revised. With Law on Curves. 8vo, cloth. New York, 1870. . . . . 2 50
- Practical Tunnelling. By F. W. Simms, C.E. 2d edition. Revised by W. Davis Haskoll, C.E. 1 vol., 8vo, cloth (out of print).
- SPON'S** Pocket Tables and Memoranda for Engineers.—Selected and arranged by J. T. Hurst. 36mo, morocco. London, 1870 . . . 40
- STEVENSON.**—Civil Engineering of North America. By David Stevenson. (Weale's series) . . . 1 20
- TRAUTWINE.**—The Field Practice of Laying out Circular Curves for Railroads. By J. C. Trautwine, C.E. 6th edition, revised and enlarged. 12mo, morocco, tucks. Philadelphia, 1869 . . . 2 00
- A New Method of Calculating the Cubic Contents of Excavations and Embankments by the Aid of Diagrams. By J. C. Trautwine. 3d edition, revised and enlarged. Philadelphia, 1869 . . . 2 00
- The Civil Engineer's Pocket-Book. By J. C. Trautwine. Tucks . . . 5 00
- VOSE.**—Manual for Railroad Engineers. By Geo. L. Vose. 8vo, revised edition, cloth. Boston, 1873. . . . . 12 50
- WEALE.**—Engineers' Pocket-Book. Published annually. By John Weale . . . 2 50
- WHIPPLE.**—An Elementary and Practical Treatise on Bridge Building. By S. Whipple, C.E. New York, 1872. . . . . 4 00

—ALL KINDS OF—

# SURVEYING AND DRAWING ✻ INSTRUMENTS ✻

PROMPTLY AND ACCURATELY REPAIRED.

---

Send for estimates on all goods you may need in your  
Draughting Room; you will find it to pay,  
no matter how small the order may be.

---

*PARTICULAR ATTENTION IS CALLED TO OUR*

NEW BLUE PROCESS PAPERS,  
AURORA AND VULCAN,

The greatest labor-saving invention that has  
ever been introduced in the  
drawing-room.

---

Special Discounts to Architects and Draughtsmen.

---

Send for **Mathematical Catalogue.**

**A**LL kinds of Surveying and Drawing Instruments,  
Swiss Instruments, Alteneder's Instruments, Ger-  
man Silver Instruments.

**Tracing Paper, Blue Print Paper, Mounted Drawing  
Paper, Imperial, Sagars and Reliance Tracing  
Cloths, W. & N. Moist Colors, India  
Ink, Faber's Pencils, Camel-  
Hair Brushes.**

## →‡ TRANSITS, LEVELS ‡←

All kinds of Surveying and Drawing Instruments promptly  
and accurately repaired.

### **LEVELING-RODS REPAINTED.**

Prepared Blue Print Paper made fresh on receipt of  
orders, in sheets, or in five, ten, twenty-five  
and fifty yard rolls.

To Schools, Academies and Colleges  
a special discount.

Also to Students attending Maryland Institute, Manual  
Training School, and other schools, a special  
inducement is offered.

### **ALL GOODS WARRANTED AS SOLD.**

*SEND FOR SAMPLES, CATALOGUE, OR CALL AND CONVINCE YOURSELF.*

ESTABLISHED IN BALTIMORE, 1879.  
ESTABLISHED IN PHILADELPHIA, 1783.

Always on hand, second-hand Levels, Compasses and Transits

IMPORTER AND DEALER IN OPTICAL AND MATHEMATICAL GOODS.
